Family Transition Project

Home and family is at the heart of the Family Transition Project. FTP families have experienced the successful transitions of their loved ones from state operated developmental centers to homes in their communities of choice. We share these successes with families who are contemplating or just beginning the process. We provide compassionate support to families, helpful information, and a lifelong experience in coping with the challenges our loved ones face and the barriers we and they may encounter. But most of all we offer hope that a successful transition is possible and is well worth it.

Ligas Family Advocate Program

The Ligas Family Advocate Program has one purpose - to connect recipients of Ligas award letters seeking Home Based or CILA services and their families with family advocates who are knowledgeable about creative ways to utilize their Ligas funding to build successful lives in the community. Ligas family advocates will work to provide information to award letter recipients and their families about options. A primary goal of the program is to connect families with other families so they can share their unique perspective as stakeholders in the system. This program will initially focus on Ligas class members within the areas served by three Independent Service Coordination agencies: Community Service Options Inc., Developmental Disabilities Services Metro East and Suburban Access. The overall goal is to roll out this program state-wide. Data collected from Ligas class members and their families will be shared with the Ligas Court Monitor and the Division of Developmental Disabilities to promote positive systemic change.
